

Yihui Wang (Halley)

5+ years in backend and AI agent engineering. Ant Group P7; project owner for Insurance Quick Check and Da Bao Business Harness. Focused on **agent runtime, context engineering, MCP, evaluation and reliable production delivery**.

Basic info.

Yihui Wang (Halley) / Male / 1997

Work Experience:5 Years / P7

Education:

Peking University 2019–2021
Software Engineering · Second Bachelor Degree · Rank 15/139

Shihezi University 2015–2019
Rank 1/69

Chongqing University 2017–2018
Exchange · Rank 24/100

English CET-6 · Technical essay

Application.

Lead Engineer, AI Agent Systems

Honors.

★2026
Insurance ACE | AI Pioneer

🏆2025
OceanBase AI Hackathon | 2nd Place / Team Leader | MCPAdvisor

★2025
Alibaba & Ant Technical Honors | ATA Best Individual Agent Practice, Ant Outstanding Creator, and Insurance FinTech AI Star

2025
Ant Open Source Training Camp | Best Contribution Award: AgentUniverse PR #202

Influence.

Technical Talks
CCF TF #179 and AI Maker Shanghai; invited to share Agent Native, Harness Engineering, and AI Coding with Gaode, Ping An Health Insurance, and multiple Alibaba / Ant technology teams

Technical Writing
Republished by Alibaba Cloud Developer: 10,000 views and 1,300+ shares; business-finance integration practice published by Alibaba Technology

Experience.

Work Projects

Ant Group · Ant Insurance FinTech 2024.06 - Present

Project owner for MCP and Insurance Quick Check; since 2026.09, leading Da Bao · Business Harness, incubated by Ant Xiaobao, coordinating three engineers on Agent-driven business improvement.

Insurance Quick Check · Architecture / Context / Page AIGC 2025.06 - 2026.08 Details

Led a million-MAU insurance agent architecture using **Runtime-Executor-SessionPool** across context production, page generation and chatbot workflows; peak traffic approximately **2,000 requests/minute**. Coordinated application, algorithm, search and frontend teams.

Structured policy documents, OCR and product facts into reusable context. Supported **20,000 products and 100,000+ tasks** with long-running scheduling, retries and quality checks.

Built evaluation across completeness, faithfulness, reasoning quality and compliance on **200+ rolling samples**, plus meta-evaluation of repeatability and agreement with expert scoring.

Da Bao · Business Harness (New Initiative) 2026.09 - Present

Lead a business harness built on **Codex App Server**, providing capability discovery, execution-trace observability, sandbox experiments and evaluation gates. Coordinate **three engineers on a project basis**; integrated Ant Xiaobao and Insurance Quick Check.

Connect production bad cases to diagnosis and repair, sandbox validation, PRs / controlled releases and production feedback. Extend this verified-delivery workflow toward business-growth experiments.

MCP / Tool Calling Toolchain 2024.12 - 2025.06 Details

Led **MCPBridge and domain MCP servers**, adapting existing HTTP / HSF services into reusable tools for business data, rules, retrieval and analytics. Designed **tool schemas, discovery, argument construction, error feedback and context enrichment** to reuse domain capabilities across agents.

Chatbot · Product-Pool RAG / Embedding / A2UI 2025.06 - 2026.08

Details

Owned the product-pool RAG / embedding pipeline: query vectorization, Elasticsearch retrieval, three-path concurrent fallback and source-document navigation.

Led the **A2UI backend protocol and event stream**, validating the contract with a full-stack demo. Partnered with frontend engineers on interactive cards and shelves; algorithm / search teams owned product selection.

Taotian Group · Tao Factory 2021.06 - 2024.06

Worked on business-finance integration and pre-sales AI, spanning complex data platforms, RAG knowledge bases, intelligent Q&A, recommendation, and business automation.

Money-Bill-Invoice Integrated Data Platform 2022.10 - 2023.10

Details

Led settlement, billing and supplier-invoice integration across **10+ billing scenarios and tens of billions of records**, using MaxCompute, PostgreSQL and BigTable. Built a **domain-specific language** for billing and accounting rules, reducing development cycles to one week. Published the practice through Alibaba Technology.

Open Source

MCPAdvisor 2025.05 Details Source

Built MCPAdvisor for natural-language-driven **MCP server discovery, selection and installation**. Team leader; **2nd Place, 2025 OceanBase AI Hackathon**.

Skills.

- **Agent Harness / Runtime**: Runtime, Executor, Session Pool, event streams, tool scheduling, long-running task governance, session state, and incident analysis
- **Agent Applications / AIGC**: structured context production, offline / online hybrid generation, A2UI protocols, and financial-domain delivery
- **Evaluation / RAG / MCP**: generation and meta-evaluation loops, vector retrieval and source navigation, Tool Schemas, and domain MCP Servers
- **Engineering / Data**: Python, Java, React, PostgreSQL, Elasticsearch, MaxCompute, Flink, MySQL, and BigTable
